

May 26, 2016

**WESTERN CANADIAN COAL SOCIETY
NETWORKING EVENING**

Guest Speaker: Sean Ennis

Vice President, Mining - Norwest

**Impact of the new rules for Operating and
Permitting Tailings Dams in British
Columbia**

Mr. Ennis works in both the areas of mine engineering and mine geotechnical/geoenvironmental engineering. He has over twenty years of experience in the mining industry. He is involved in geotechnical and geo-environmental issues related to mining, including mine waste management, slope stability and mine closure for metal, coal and oil sands projects. He has site experience in various disciplines of the mining industry such as short and long range mine planning, surveying, project management, and site investigation. He is registered as a professional engineer in Canadian and United States jurisdictions. He is also a qualified person under Canadian National Instrument 43-101 regulations.
